Look here, Mr. Orchardist,

that crop has cost you a whole lot of anxiety. Your weather eye has been watchful day and night, fearing for its safety.

And now that it's safely harvested, are you going to let up on your vigilance? How about the safety of the proceeds?

When you harvest your dollar crop, store it in this bank.

Then you may rest assured it is absolutely secure.

Announcement

I am now in a position to resume my piano instructions and will be pleased to make arrangements for lessons. For appointments call at 73 N. Central avenue or telephone Campbell 29J.

MRS. EMILY PANNELL GARD.

General Hauling by teams or motor truck. Furniture hauled anywhere. Reasonable prices.

E. C. MERRILL

Phnoe Campbell 13J

Quality stationery to suit your taste, at Smith's.

Messrs. Jos. Frank and Jas. Quirk of Philadelphia, escorts of the Liberty Bell on its famous "seeing America" trip, were visitors at the Jos. Bonnett home on Los Gatos road Sunday. Both gentlemen were very enthusiastic over the big ranch and especially delighted with the sanitary milk house. They are going back home with some fine new ideas about ranch life and work.

Annual Rally Bonfire

Hurrah for the Annual Bon-Fire, preliminary to the Rally Day services at the Congregational church. The bonfire will be in the back yard of the church lot. Lots of room for bonfire and a big crowd. A delightful program, as each teacher and officer does some special stunt, and each class wants their teacher to be and do the best. Fine refreshments.

Lecture

The public was given a very entertaining and instructive illustrated lecture on the conditions and American relief work in Belgium. Mr. Spaulding's experience in the work there and thorough knowledge of the war activities mnde his talk much more entertaining.

The Country Woman's Club is to be congratulated for securing this lecturer and thereby benefiting the library as well as affording the treat.

The glee club, accompanied by Mrs. G. S. Robson at the piano, sang two selections. Mrs. Ellen R. Smith, president of the Club introduced the speaker.

Local and Personal

SMITH SELLS STATIONERY.

Farmers Union are sole agents for the wonderful Wizard Fertilizer.

Mr. and Mrs. F. R. Glover spent the week-end at the Exposition.

C. J. Granstrom spent part of the week at the Fair celebrating with the Odd Fellows.

Mrs. R. G. Archibald went to San Juan Tuesday to spend the week with her father.

S. Artese has opened up a shoe repair shop in the F. O. Putnam building on Campbell avenue.

Fine Assortment Heaters, Stoves and Ranges, Burn Wood or Coal. Reduced Prices. Whitman's.

Wizard Fertilizer is for lawns, flowers, gardens, shrubs, houseplants, orchards and fields. Ferns love it.

Are you going to place a New Range in your home this fall? Reduced prices at Whitman's Hardware.

Young prune trees on Bitter Almond Root at reasonable prices. Address Geo. E. Hyde & Co., Campbell, Cal.

Finest nursery trees in the valley for sale at reasonable prices. Enquire of Geo. E. Hyde & Co. Campbell 34J.

Kodak finishing is Hulse's specialty. Have your favorite pictures enlarged free. Smith's Stationery Store is Campbell agent.

For Style, Fit, Comfort and wear, W. L. Douglas $3.50 and $4.00 Shoes have no Equal. For sale at the Campbell Cash Shoe Store.

Rev. W. H. Lloyd is seeing the Exposition this week as well as attending M. E. conference. He will occupy the local pulpit Sunday.

Lost: A gold bar pin set with one diamond, on Union, Campbell, Hamilton or Leigh avenues about six weeks ago. Finder leave at this office for reward.

The Chas. Townsend and J. Enemark families motored to Mt. Hamilton for a bit of stargazing. We were not informed as to just which ones were moon-struck.

Big Reduction in price of all Wood Heaters, Stoves and Ranges at Whitman's Hardware Store. Come in and make an Early Selection while the assortment lasts.

Dr. Sidney Broadbent of Hollywood was here this week the guest of his cousin, W. B. Kammerer. He gave a very instructive talk to the upper grammar grades Tuesday on first aids to the injured.

Mrs. P. Stier arrived Tuesday from Mingo, Iowa, for a visit with her daughter, Mrs. Robt. Densmore. Mrs. Stier will remain over winter and probably longer to enjoy our delightful climate and see our valley.

Mr. and Mrs. Chas. Sutter spent the week-end seeing the Exposition sights. In the three days there, they saw everything, says Chas. but we understand they missed a few of the buildings and must go again to take it all in.

Mrs. J. C. Harris and children will go to San Francisco today to spend the week-end at the Exposition. The children will return for school and Mrs. Harris will remain for a few days visit with her husband who is at work there.

Mr. and Mrs. Vaughn Lloyd and two older sons went to San Francisco, Saturday to visit the Exposition. Vaughn is Noble Grand of the local I. O. O. F. lodge and took in the big doings of that order at the Exposition grounds Wednesday.

Mr. and Mrs. W. R. Coupland, Gladys and Frank, Miss Eva Eldred, O. D. Poston, A. C. Lantz and Mr. Peat accompanied Messrs. Chas. Townsend and J. Enemark in their autos to the Exposition Wednesday to attend the I. O. O. F. day celebration.

D. W. Waite enjoyed a visit with his son, C. M., and wife, of San Francisco, and daughter, Mrs. G. G. Staehle of St. Paul, Minn., who were here for Sunday. They are seeing the exposition this week and will come again Sunday. Mrs. Staehle will remain for a time.

The M. E. conference for Northern California closed Tuesday. A number of changes in pastors were made, but Rev. W. H. Lloyd is returned to Campbell. Rev. L. R. Fulmer of Los Gatos and well known here has been given the College Avenue church at Berkeley. Rev. J. S. Troxell is placed at Los Gatos.

Funeral Services

The funeral services of I. Preston were held at the Congregational church Saturday morning, the Rev. G. E. Atkinson officiating, and the G. A. R. of E. O. C. Ord Post having charge of the interment and services at Los Gatos cemetery. Music was furnished by a male quartet, Messrs. A. L. Adam, H. C. Smith, C. P. Herrington and E. Barron. The pall bearers were C. N. Cooper, A. P. Merrill, I. Zion, A. F. Hills, J. G. Fitch and Mr. Billings, all members of the Post.

Faith in the Future

One of our enterprising business men, in fact the dean of Campbell business men, is a thorough optomist and believes in larger and better things for Campbell. While all are feeling the strain of the times and some may be inclined to slacken their effort, this enthusiast is expanding and enlarging his store capacity in preparation for the better times that are sure to come. This hustler for business is C. H. Whitman who opened a hardware and plumbing house in Campbell in 1895. The following year was a dull one, but during this period of 1896, Mr. Whitman siezed the opportunity to build his store and increase the efficiency of the shop for the coming good times, which did come. He is now adding a front on Central avenue, concrete being laid and the heavier building materials and a full line of oils will be carried in this department.

Mr. Whitman looks for a great brightening up in business over this entire country and is an active believer in "preparedness."

First Fire Drill

The fire department held its first regular fire drill Monday evening. The call had been prearranged by Commissioner Lanz and was kept a secret from the members of the department. When the alarm was turned in the boys were trying out the hydrants in another part of town. All the hose was unreeled and stretched in the street and had to be wound on the reel before moving.

The chemical crew was short as a number of the boys were away but the run was made in good time.

The huge bonfire was started on a vacant lot east of the E. C. Merrill hay market and was fully ablaze before the crew arrived. The chemical made short work of the job.

When the hose was attached to the hydrant at the lumber yard there was hardly pressure enough to be of any good.

Several of the citizens have raised objections to the ringing of the bell on account of the excitement but these drills are a necessity as a means to better efficiency. The bell will be rung for a short time for the drills and continuously for several minutes in case of a fire.

The regular drills will also serve to accustom the towns people to the bell.

Housekeeping for Neighbors

The hardest housekeeping in the world is the housekeeping that people do for their neighbors. Half the troubles we have are caused by worrying about what people think. What difference does it make what they think, anyway? No one can live his own life and two or three other people's lives besides. What's the use of setting up housekeeping on the roof or on the outside walls for the benefit of the neighbors? You would rightly be judged insane if you suggested anything of the kind, and that is practically what half the people do. They can't do this because the neighbors wonder if they could not afford to do something else. They may not say it in so many words, but they mean it, and it is simply a great big vacuum in some of our natures where moral courage ought to be. Half the sting of poverty or small means is gone when one keeps house for himself and not for his neighbors.

Congregational Church

"The Friendly Church just around the Corner."

Next Sunday—the last Sunday of Sept.—is our Annual Rally Day in Sunday-school and Church, following our splendid annual Bonfire Social. A special Rally Day programme has been prepared for the Sunday-school hour. Let us plan to have every member present, their friends also.

The theme for the Rally Day Service at the Church hour, will be: "A Working Church an Effective Projectile," being third and last of a special series. Talk to the boys and girls on "The Almost Man."

Christian Endeavor as usual. Special meeting. In the evening—7:30—the Pastor has arranged another of our delightful Stereopticon Services. This time writing. "The Coral Islands of the Pacific."

A cordial invitation is extended to you. If you have no church home, you will find a welcome with us at any and all of our services.

The prayer meeting next week will be the last in the series "Great Early Morning Scenes with the Master." Come and enjoy it with us.

GEO. E. ATKINSON, Pastor.

"The Quality Shop" that's us, KING'S.

EXTRA GOOD

We have some Manchurian walnuts that we shall sell at the low price of 15c a pound. The nuts are like English walnuts, both as to looks and flavor, but the shell is quite hard. You can't crack them in your hand but a light tap with a hammer will open them up. The meats are large in size and delicious in taste. These nuts are an extra good value at 15c a pound.

JOHN MARTIN'S NEW YORK CHEESE is the national standard for cheese with "pep" to it. Somehow the Martin's cheese that we have just now is especially fine. You will be pleased with it if you like the sharp kind. For cooking with macaroni it's just the thing. 25c a pound.

DITALINI—do you know what it is? Well, it's a small short cut macaroni. It cooks quickly, and in a way that brings out the flavor exceptionally well. Some of our customers are quite enthusiastic over it. Remember, macaroni is very wholesome, nourishing, and inexpensive. It admits of almost endless variety in cooking and serving. Use more of it. DITALINI retails at 10c a pound, or 3 pounds for 25c.

PARENTS

You should KNOW, when you send your child to school, whether or not its EYESIGHT is normal. The task imposed upon the eyes in school work is heavy and having your child's eyes in the best possible condition will play a very important part in its ability to study. Don't let false pride or prejudice against the wearing of glasses keep you from getting them for your child if it needs them. Your interest in its future demands it of you. I will be at Dr. Merrill's office Monday, Sept. 27. You can bring your child to me on that day or bring it to my office any other day and I will examine its eyes and advise you as to their needs without charge. If glasses are not needed I will tell you so, frankly. If they are you may be assured that I will furnish the best.

PAIN WITH SEVERE WOUNDS

Is Comparatively Little, Says Eminent Surgeon, and Much of Our Pity Is Wasted.

An eminent army surgeon has said that much of our pity for the victims of severe wounds on the battlefield is in reality wasted. He adds that the terribly wounded suffer comparatively little pain, and that men who are wounded unto death pass away without undergoing much suffering.

Surgeons who have experience on the war fields ought to know definitely concerning the amount of pain suffered by the variously wounded It is known, of course, off the battle line as well as on it, that a comparatively slight injury which involves the tearing of the flesh and the disturbance of the nervous system causes acute pain. Nature, it is said, makes provision that the terribly injured shall not suffer the agonies which ordinarily are considered as the necessary accompaniment of apparently cruel wounds.

It does not seem, however, as if it were exactly human to say that pity for the terribly injured is wasted. The pity is as much for the wound and for the future disablement of the victim as it is for the present pain. Stories which come from laymen bear out, however, the surgeon's word that the terribly hurt do not suffer much, at least at the time of the infliction of the injury.

One of the firemen on the Lusitania had his right arm blown off at the shoulder either by an explosion in the engine room or by the torpedo which sent the ship to the bottom. The man did not lose consciousness and managed to make his way to the deck, from which he jumped into the water. He kept himself afloat for nearly half an hour. He was picked up, and later his terrible wound was attended to. He has recovered, and he says that he was hardly conscious of pain until several hours after the injury was inflicted.

Nature is called the mother. Sometimes she is cruel and sometimes she is kind. She makes a pin prick hurt and yet tempers suffering when the cut goes deep. She works curiously, but, doubtless, according to a well organized plan of which man as yet has no thorough understanding.—Chicago Evening Post.

MOST REAL FRIEND OF MAN

Dog Is a Comrade Whose Loyalty Never Wavers, Whose Devotion Is Certain.

Your dog is ready to go with you anywhere, at any time, through anything, like Good Deeds in the old play. He is something more than a respectable family possession, a toy, a part of an exhibition; he is a comrade, whose loyalty never wavers, whose devotion never obtrudes itself; who responds to your mood without pluming himself upon his tact and who neither commiserates nor flatters.

After you have taken a few tramps together you understand each other perfectly, and there is no fear of either changing his mind unless you yourself prove fickle past belief.

And, when you are no longer friends with your dog, you are beyond saving. —Countryside Magazine.

Maeterlinck's First Failures.

M. Maurice Maeterlinck began his literary career with three apparent failures, says the London Chronicle.

The first was the founding of a literary review, which quickly went under; the second the publication of a volume of poems, which failed to attract attention, and the third was the issue of a play, "La Princesse Maleine," of which he printed just twenty-five copies with his own hands and gave them away.

A year later chance brought a copy of the play into the hands of M. Octave Mirbeau, who wrote a glowing eulogy of it in Le Figaro, and Maeterlinck awoke one morning to find himself famous.

The Southern Ocean.

According to a note in the Geographical Journal, the name "Southern ocean" has been recommended by the British admiralty and formally adopted by the commonwealth of Australia and the Union of South Africa to designate the whole oceanic zone encircling the globe south of Australia, Africa and South America. The name is, of course, not new, but it is not to be found in Lippincott's Gazetteer, and has been used in a merely tentative way by many geographers. As the admiralty mentions the Antarctic continent as the southern boundary of this body of water, no room is left on the map for an "Antarctic ocean."

Exhibiting a Poet.

Matthew Arnold was sitting in his study one morning when the butler showed in an American lady and a small boy. The lady said: "Glad to make your acquaintance, Mr. Arnold. I have often heard of you. No, don't trouble to speak, sir! I know how valuable your time is!" Then, turning to the boy, she said, "This is him, Lenny, the leading critic and poet—somewhat fleshier than we had been led to expect!"—A. C. Benson, in Atlantic.

CITY OF THE SISAL KINGS

RESIDENCE OF SISAL MILLIONAIRE

IT IS from the state of Yucatan, Mexico, that the sisal fiber is obtained for the manufacture of binder twine for the American farmers. That far southern state of the war-ridden republic also supplies most of the raw chicle for the manufacture of chewing gum, writes W. D. Hornaday in Grit. These are the two principal reasons why the recent blockading of the port of Progreso by a Carranza war vessel created such a stir in certain industrial circles of the United States.

During the last twenty-five years the growing and exportation of sisal fiber, which is obtained from the leaves of the henequin plant, have brought enormous wealth to Yucatan. It is said that Merida is the home of more multimillionaires than any city of its size in the world. These men of wealth all made their fortunes out of the sisal industry.

Up to the beginning of the present revolutionary period in Mexico and dating back more than a decade Merida was the real money center of Mexico. A veritable stream of gold constantly flowed out of the local banks through the channels of trade to other parts of country and even into the larger financial centers of the United States and Europe. The annual revenue which the Yucatan planters obtained from their sisal product ranged from $20,000,000 to $40,000,000. These men have continued to reap large profits from the industry all through the war disturbances as the exportation of the fiber was not interfered with by the different contending political elements until recently. There is at present an unusually large stock of fiber on hand awaiting export. Most of it has been already purchased by an American company that manufactures binder twine on an extensive scale. The outgoing shipments of the product will now be made as rapidly as ships can take it out of Progreso, which is the deepwater port of Yucatan.

Most Progressive Part of Mexico.

The henequin planters have been made to contribute several million dollars to the different revolutionary factions during the last few years, but the levying of this tribute has been no burden to them. On the whole, the state has probably been more prosperous in the face of the revolutions than any other part of Mexico. This was due in part to its isolation from the remainder of the republic. It has no railroad connections with the other states, with the exception of Campeche. The United Railways of Yucatan has a line that runs to the town of Campeche. Just before Diaz resigned from the presidency the federal government granted a concession to a foreign syndicate for the construction of a railroad from Campeche to a connection with the National Tehuantepec railroad, a distance of about 450 miles. The surveys for the proposed line were being made when the Madero revolt caused a stop to the work.

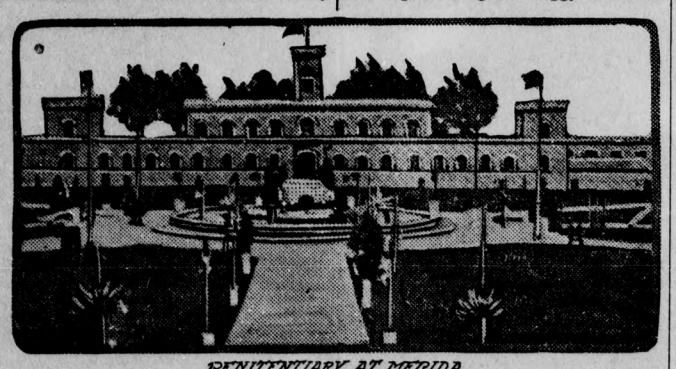
What is now the territory of Quintana Roo was formerly a part of Yucatan. It was created about fifteen years ago and placed under military rule in order to better cope with the rebellious Maya Indians. These Indians are degenerated remnants of a once powerful and highly civilized race of people that inhabited ages ago what is now southeastern Mexico. The ruins of the former civilization are scattered through the dense tropical forests of Quintana Roo, Yucatan and Campeche. They consist of large cities, monuments, temples and a variety of other interesting works of a race that is now almost extinct. The Mayas have never submitted to Spanish or Mexican rule. Their warriors are still carrying on a guerilla fight against the Mexican settlers who have encroached upon their inhabited domain.

Besides the sisal fiber and chicle gum that are obtained in Yucatan and Quintana Roo, the tropical forests are the source of a large supply of mahogany timber that is exported to the United States and Europe. On account of the unsettled condition of affairs most of the mahogany logging camps have been temporarily abandoned and very little of that timber has been exported for several months.

Always Friendly to Americans.

The people of Yucatan have always been friendly to Americans. They have a great admiration for the United States. In fact, this liking was so great that the government authorities there about 1848 during the war between Mexico and the United States, made a formal offer that Yucatan be taken over by the latter country. This offer was refused by the government at Washington. Bordering the then state of Yucatan on the south was British Honduras. When the proposed annexation to the United States was refused a proposition was made to the British government that it take over the state and add it to British Honduras. This plan also met with failure.

Politically speaking, the people of Yucatan have never been in sympathy with that part of Mexico which lies to the north of the Isthmus of Tehuantepec. Even during the long reign of President Diaz there was at all times a strong undercurrent of ill-feeling towards the federal administration on the part of the people there. It was the existence of the opposition that caused Diaz to adopt conciliatory tactics in his appointments to office and general administration. In nearly all of his cabinets there was at least one representative from Yucatan.



PENITENTIARY AT MERIDA

The Unappreciated Drummer.

"There are traveling Americans who have never seen the inside of the hotel that depends upon commercial men to keep it going. They may know the large houses of Florida, the huge structures along the northern beaches, the caravansaries in New York, but they pass through life without experiencing the soggy "comforters" of the middle West, the short sheets of the South, or anywhere the overpowering odor of an abandoned cigar stub that cannot be found. It is a pity, for the traveler never fully knows the world.

"In every mill town where there is power you find your room blazing with light, and every year you will find added private bathrooms, a decorous array of towels, and an inclination on the part of the chambermaid to let one sleep in the morning without rattling the doorknob every five minutes.

"It is the drummer, supposed to be composed entirely of jokes, who is as vigorous in his demands for long sheets as is the motorist for good roads."—Century.

To Amuse the Children.

Soak a cupful of dried peas over night. They then can be easily pierced. At the same time provide a box of wooden toothpicks. By combining the two your children will find amusement by the hour in making playthings of every description.

Kindergarten cards to amuse children may be fashioned from the colored pictures found in vegetable and floral catalogues. Put a piece of heavy white paper under the colored picture and prick with a pin all around it. You will find an outline of the same thing on the white paper, and the design may be sewed from hole to hole with a bright-colored yarn or embroidery cotton.

A sand pile is a capital place for the youngest children to play, and it will hold their interest longer if some colored marbles, shells, pebbles, even bright bits of broken dishes, are mixed through it, on the sly, for them to discover as they dig.

TIME FOR THE HEAVY MEAL

Frenchman Asserts That It Is Early in the Morning, But Some D'ffer With Him Radically.

The undisturbed if not heroic digestion which arises at the first clear note of the wood thrush, and, after the due process of orderly kitchen events, sits eager and appetent before a slice of fried ham, a dish of fried potatoes, a stack of wheats, a bowl of oatmeal, a platter of fried eggs, etc., is worthy of note these days.

Our nerve organization requires time for preparation to meet the daily exigencies. It has to be warmed up, and, like a baseball pitcher, cannot go cold to its work. It suggests to the appetite that a bit of fruit, a soft-boiled egg and a cup of coffee will represent sufficiency and kindness to the interior economy.

Therefore when a French man of wisdom, with seeming logic, says that the heavy work of digestion ought to be thrown upon the rested digestive organs and that consequently the "heavy meal" of the day ought to be eaten early in the morning, we reply that his theory is plausible, but in error. Digestive organs may be rested in the morning, but they are not ready to work, except in the case of the nowrare and always heroic digestions before mentioned.

Moreover the French man of wisdom is socially wrong. One may welcome the cheering presence of one's fellow man at six o'clock in the morning, but no lover of the human race wants to see his brother at six o'clock in the morning. The inalienable right of humanity at six o'clock in the morning is a grouch, a silent, comforting grouch, which only asks of humanity that if it cannot keep out of sight, at least it keep its mouth shut.

Eating is as much social diversion as it is stoking. As stoking it would become abhorrent and men would flee to thickets with their meat if eating were not also social. A dinner, properly considered, is the gentle fourth or fifth act of the day. The climax has been reached. The stress has been endured, the complications mastered, and the mind comes restfully to the services of the body.

If we are to have the "heavy meal" of the day set at five or six o'clock in the morning, it will be served to a generation which sits up all night.—Chicago Tribune.

Above the Clouds.

A Hungarian officer, describing the fighting on the Tyrolese mountain peaks, a mile above sea level, states that the most difficult problem for the staff is to maintain the supply of food to the troops. On account of the high altitude and the continuous physical strain they need good supplies and plenty of them.

The officer pays a tribute to the work of the Red Cross. "Our wounded have to be carried down in sheets tied to the end of sticks, and it takes a dozen men to carry one down," he remarks.

Scout duty is particularly dangerous, except for skilled Alpinists, and many of these never return. Touching on the remarkable echoes thrown back by the mountain peaks, the officer says:

"The roar of the guns is heard twice, thrice, or perhaps a dozen times, the echo throwing the sounds back and forth, and transforming a single report into a fusillade. Many of our men have been rendered unconscious or even driven mad by the fearful noise of the guns in the rarified atmosphere of these high altitudes."

Choosing the Camp Site.

Certain rules should be used in the selection of a site to be occupied for any length of time. Clay and limestone are undesirable as the surface water stands on them after rains. A gentle slope drains the ground; the liability of storm water from higher ground must not be overlooked. A light loamy or sandy soil is the one of preference; avoid damp low places and ground in which the water is very near the surface. The foot of a hill is liable to remain wet several days after a rain. The tendency is to get too near the river or lake on which a camp is usually pitched; unless the land there is well above the water, it is undesirable. Avoid a site that has just been vacated by a camp that has occupied it for some time. Put kerosene on all stagnant water—it prevents the breeding of mosquitoes; if water is kept standing in fire buckets, it should be changed twice a week or have a thin coating of oil.—Outing.

Crazy Autoists.

The recklessness of some automobilists passes belief. The Long Island railroad has been compelled to remove the usual lightly built crossing gates and substitute barriers made of heavy timber as big as telegraph poles. This action has been taken because between July 3 and July 7 there were no less than six cases in which drivers forced their machines through the lighter gates and across the tracks in front of approaching trains. If such fools were killed, it would be small loss. The trouble is that persons so indifferent to their own safety are even more indifferent to the safety of others.—Chicago Evening Post.

They Never Die.

"There are songs," said the musician, "that have never, never died. They go ringing down the ages."

"That is true, sir," Brown replied. "For the last six months and upward I have heard my daughter try to kill two or three each evening, but they never die."—London Opinion.

Knitted Silk Bonnet for Small Girl

Now that industry has become fashionable and everyone is knitting or crocheting or doing some sort of needlework, the evidences of the "keep-busy" fad blossom out in all directions. The family, from baby to grandma, revels in pretty things in the way of dress accessories, and the house is decked out with fine specimens of needlecraft.

Among the most successful of all the articles knitted or crocheted, baby bonnets, hats for little girls, and boudoir caps and hats for grown-ups testify to the adaptability of this kind of work to headwear. Baby bonnets, either knitted or crocheted of silk, have long been among the coveted luxuries that each mother manages somehow to secure. They are very durable and very beautiful. Crocheted headwear is somewhat expensive, and one must either have the time and knowledge of the work required, to make it, or be prepared to pay the price which elegant, handmade things will bring.

The small knitted hat of silk shown in the picture is moderately priced at four or five dollars. It is knitted of heavy silk thread in cream color, and consists of a cap which covers the crown of the head, and a frill of lace, knitted of the same silk as the cap. It is finished with a tassel made of the silk.

Fascinating boudoir caps are made by crocheting heavy silk thread in an open design. They are shaped like the caps made for infants, and finished with crocheted shell or scallops about the edge. Ribbon is run in them about the face and across the back. It fits the cap to the head and decorates it at the same time.

Crocheted hats are made of silk fiber, chenille, or wool, and are very smart for motor wear, for traveling, and for the street. Fine wire is used in shaping them, and they are made by professional workwomen who understand how to conceal the wire in the crocheted stitches.

JULIA BOTTOMLEY.

About Girdles.

Girdles which used to encircle milady's dainty waist are not to be found in that region this season. They have moved upward, most of them, to give the new high-waisted effect. From this high position they are apt to wander in and out of draperies, often creeping under the full skirt to tie in a part at the front or back of the hem. One pretty girdle had three long loops falling directly under each other, and in the end of each loop was caught a full-blown pink rose. Another girdle of sulphur yellow was so completely hidden by the chiffon overwaist that you could only guess at its presence on the dress.

Between-Seasons Hats

Created for those whose needs demand hats for the period between two seasons are hats made for the warm, bright days of early autumn, with an eye to the frost that may overtake them in the midst of their usefulness. Here are three of them, in fashionable black and white. They will solve the problem of the woman who feels that it is too late for the purchase of a summer hat and altogether too early to wear one belonging to wintertime. She will find these just suited to bridging over the interval between two seasons.

Very popular with the younger people, small turbans are made in combinations of black velvet with white silk or satin and trimmed with fancy feathers or wings. The pretty example shown in the picture has a coronet of velvet and a crown of satin. White wings, in the smart pose, on the crown, are the only trimming used and all that is needed.

One of the new wide and drooping brimmed shapes may be made of silk or velvet or of the two combined. It reflects the fad for needlework in its decoration. Parallel rows of long stitches made of heavy white silk adorn the crown, and a single row finishes the brim-edge. A band of velvet ribbon confines the crown, and a butterfly of white crystal beads suggests a bit of frost painting. This is a beautiful and unusual development of the picture hat.

Suited to the matron as well as to the younger woman, the sailor hat of white corduroy and satin, faced with black velvet, is of the sort that may be worn anywhere. The upper brim and top crown are of corduroy, and the side crown is covered with satin laid in folds. Odd, new ornaments of beads and curving ribs of feathers, or "feelers," as they are called, are applied to the crown.

JULIA BOTTOMLEY.

Baby's Everyday Dresses.

To make everyday dresses for baby, purchase white washable crepe. Make the little garments plain, with a sleeve that goes to the neck. Few seams are required and but one buttonhole. Time and labor are saved in laundering, too, as no ironing is needed.

FARMER'S WIFE TOO ILL TO WORK

A Weak, Nervous Sufferer Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Kasota, Minn. — "I am glad to say that Lydia E. Pinkham's Vegetable Compound has done more for me than anything else, and I had the best physician here. I was so weak and nervous that I could not do my work and suffered with pains low down in my right side for a year or more. I took Lydia E. Pinkham's Vegetable Compound, and now I feel like a different person. I believe there is nothing like Lydia E. Pinkham's Vegetable Compound for weak women and young girls, and I would be glad if I could influence anyone to try the medicine, for I know it will do all and much more than it is claimed to do." — Mrs. CLARA FRANKS, R. F. D. No. 1, Maplecrest Farm, Kasota, Minn.

Women who suffer from those distressing ills peculiar to their sex should be convinced of the ability of Lydia E. Pinkham's Vegetable Compound to restore their health by the many genuine and truthful testimonials we are constantly publishing in the newspapers.

If you have the slightest doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass., for advice. Your letter will be opened, read and answered by a woman, and held in strict confidence.

Come and Go.

"Do you keep any servants?"

"No, of course not."

"But I thought I saw one in your kitchen."

"Oh, we have servants on the premises a day or two at a time, but we don't keep them."—Houston Post.

Not the Only Difference.

She—A clock is different from a man.

He—In what respect?

She—When it strikes it keeps on working.—Philadelphia Record.

An Easy Way to Get Rid of Ugly Pimples

Bathe your face for several minutes with resinol soap and hot water, then apply a little resinol ointment very gently. Let this stay on ten minutes, and wash off with resinol soap and more hot water, finishing with a dash of cold water to close the pores. Do this once or twice a day, and you will be astonished to find how quickly the healing resinol medication soothes and cleanses the pores, removes pimples and blackheads, and leaves the complexion clear and velvety.

Resinol ointment and resinol soap stop itching instantly and speedily heal skin humors, sores, burns, wounds and chafing.—Adv.

A Vain Search.

Mrs. Parvenu—John, that Mrs. Kawler, who was just here, said she had been having a bad attack of ongwee. What's that?

Parvenu—Something catchin', perhaps. Why don't you look it up in the dictionary?

Mrs. P.—I did. I went through all the O's, but can't find no such word.

After the Trial.

"Now if you are acquitted," said the lawyer, "you can go on the stage."

"But suppose I should happen to be convicted?"

"Um. In that case I suppose you'll have to write a book."—Kansas City Journal.

CAP and BELLS

STEWED APPLES AND CREAM

Waiter Followed Instructions to Letter and Maker of Bad Joke Had to Settle the Bill.

The joker who makes a bad joke deserves it turned on him, as it very often is.

A man who dined at a restaurant was asked in the ordinary way by the waiter what he would have for the next course.

"You may bring me stewed apples and some cream."

"Yes, sir."

"Only let me have them without the cream."

"Yes, sir; most certainly, sir."

"And without the apples, please."

The waiter disappeared and soon returned with a plate on which lay a spoon and a little powdered sugar.

The customer looked surprised.

"It's your stewed apples and cream, sir, without the stewed apples, and without the cream," said the waiter. The item figured on the bill just the same, and the customer had to pay it.

DODGING TROUBLE.

Miss Bigmitt, the Stenog—Did you fire me just 'cause I misspell a few words now an' then an' sometimes get balled up in my notes?

Mr. Littleton—By no means. You see, I have an unreasonably jealous wife, and she won't allow me to keep a pretty young stenographer in my office.

Feminine Consistency.

"What's the matter, Hawkins?"

"Matter enough! You know some time ago I assigned all my property to my wife to—er—to keep it out of the hands of people I owe, you know."

"Yes."

"Well, she's taken the money and gone off—says she won't live with me because I've swindled my creditors."

No Gardener.

"What are you fooling with there?"

"Asparagus. First, you trench it, next you get it started, then you transplant it. In a couple of years you will have a fine crop. Better plant some."

"Not for mine. I don't see why anybody should go to all that trouble when you can buy it for 13 cents a can."

Juvenile Imagination.

"Don't you know that you ought to be careful not to leave finger marks on your books," said the teacher who was trying to encourage neatness.

"Yes," replied the small boy. "Bill Jenkins told me about that. Some day the habit is liable to put the detectives on your trail."

Needed a Silencer.

"What will you have next?" asked the waiter.

"Why, I gave you the whole order," replied the lady.

"Yes, but the gentleman with you was taking his soup, and I couldn't hear you."

Doubtful.

"Arthur seems a bright, capable fellow. I think he'll get on."

"Well, he's certainly a worthy young man, but I doubt whether he has head enough to fill his father's shoes."

Unfeeling.

Judge—This is the tenth time you have come before me, Kelly.

Prisoner—I'm sorry, judge; but the cops don't seem to care how much work they make you.—Puck.

On Probation.

"Have the Bounderbys got into society yet?"

"Well, they've taken their wraps off, but there's no telling how long they'll stay."

HE WOULDN'T BE DISTURBED

While Mabel Petted and Coaxed Him Jack Was Listless—Footsteps of Father Aroused Him.

Mabel moved closer. "Jack, what's the matter?" she asked softly.

Jack looked at her languidly and gazed again into the fire.

"Jack!"

Jack turned listlessly.

"I think you're very rude," pouted Mabel.

Jack looked at her inquiringly.

"You haven't paid the slightest attention to me this evening," she said, drooping her shoulders dejectedly. "I hate you!"

Suddenly it occurred to Mabel that perhaps Jack was not well, and she reproached herself for her attitude toward him.

"Dear," she said contritely, running her hand through his hair, "are you ill?"

Jack leaned slightly. Mabel sighed. The front door opened, and there was a sound of heavy footsteps in the hallway. Jack was off the sofa in an instant.

"It's only father," said Mabel.

Jack barked and jumped up beside Mabel again.—Judge.

The Reason.

"Eh-yah!" confessed J. Fuller Gloom, the prominent pessimist. "I have changed entirely the plans of the house I am going to build in spite of the fact that the architect, my wife and various other sensible and well posted people agreed that it was as near perfect as it could be made and I myself was thoroughly pleased with it."

"Then why—"

"Oh, it didn't suit the neighbors!"—Judge.

It Didn't Work.

"I can't get by with anything."

"What's the matter?"

"I invited a girl to go to the theater. When it came time to buy the seats I was broke, so I told her the house was sold out for that night and promised to take her next week."

"Well?"

"Her aunt took her down on the very night we were to go and they and two other couples were the only people in the parquet."

Took the Hint.

"At 11:30 the beautiful Miss Flibber rose with stately grace and put a record on the phonograph. The strains of a famous aria filled the room.

"Ah!" exclaimed Mr. Boresume. "Magnificent!" What piece is that, may I ask?"

"That," said Miss Flibber, significantly, "is Tosca's 'Good-by.'"

Shortly thereafter Mr. Boresum was saying "Good night."

Gentle Sarcasm.

Blondine—Isn't Gerty Giddigap keeping company with young Beanbrough any more?

Brunetta—No; she decided he was altogether too extravagant and she passed him up.

"Is that so?"

"Yes; one evening he wanted to take her to a moving picture show in a jitney bus."

Blighted Ambition.

"So your daughter has decided to marry the count?"

"Yes," replied Mr. Wadly, with a dejected air.

"You don't seem pleased. I'm surprised."

"You needn't be. I was hoping to get a son-in-law who would be an asset instead of liability."

Not Encouraging.

"I have called," said the hungry looking party with the unbarbered hair, "to see if there is a vacancy in your joke department."

"There will be," replied the overworked editor, "as soon as the office boy gets time to empty the waste basket."

NEW VERSION.

"A man is as old as he feels."

"But how about a woman?"

"Oh, she is generally as old as other people feel she is."

What We All Think.

"I'm glad to know that you liked my sermon," said the minister to an enthusiastic member of his flock.

"Indeed I did. It was so true and so to the point. I wish a neighbor of mine could have heard it. I know it was intended just for him."

Its Kind.

"So the practical politicians manage to get a plank in the party platform to their own interest."

"Yes; what you might call a gang plank."

FLAGS IN HISTORY

Symbols Have Been Subject to Many Changes.

Those of Today the Result of Slow Growth Through Centuries—Saracens Given Credit for Introduction of Banner.

The Union Jack, the banner under which Englishmen, Scotchmen, Irishmen, Welshmen, Canadians, Australians, East Indians and men from other parts of the great empire on which the sun never sets are now fighting on the bloody fields of France, was designed 307 years ago, in 1606. The original flag of England, the banner of St. George, white with a red cross, was incorporated then with the banner of Scotland, which was blue with a white diagonal cross. This combination obtained the name of "Union Jack," in allusion to the union between England and Scotland, and to the name of the monarch who brought about the consolidation of the crowns. This was James I of England and VI of Scotland, the word 'Jack" being a corruption of Jacobus, the Latin word for James. The original arrangement of the Union Jack continued until 1801, when following the union with Ireland, the banner of St. Patrick, white with a diagonal red cross, was amalgamated with it. The red Maltese cross of St. Patrick was placed over the white cross of St. Andrew, so that a thin white line on either side is all that remains of the Scottish cross.

The many nationalities comprising the empire of Franz Josef fight under a common flag of red and white, the colors of the Hapsburg dynasty. There are red stripes at the top and bottom of the banner, and on the central white stripe appears the Austrian coat of arms. The German, Austrian and Russian banners, like the English, represent a slow growth through many centuries and with frequent changes. Since ancient times men have carried distinguishing emblems in battle, but it was not until the sixth century that the flag acquired its present form in Spain. Before that it was just a small square of cloth carried on a lance. The modern flag is said to have been introduced in Spain by the Saracens.

CLAIMS MOST PERFECT LENS

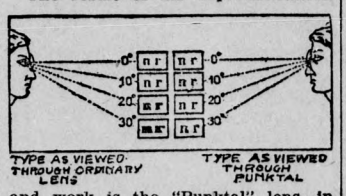
German Optician Says He Has Produced a Glass That Has No Equal In the World.

In the "Punktal," Dr. Moritz von Rohr of the scientific staff of the Carl Zeiss works, a famous German optical establishment, claims the invention of the perfect lens. It is said to be superior to either the Toric or Meniscus lenses, both recognized as great improvements over the old style flat glasses.

In old-style lenses, when the eye is rotated to one side, the line of sight passes through the lens obliquely. This defect was only partially done away with by the Toric or curved lens. In working out the new lens, Doctor von Rohr computed formulas for grinding lenses which differ from every different power.

Heretofore all lenses have been ground on one side with one or another of a set of established base curves. Believing it was impossible to produce a perfectly corrected lens in this way, Doctor von Rohr established different formulas for each side of every kind of lens required.

The result of his experimentation



and work is the "Punktal" lens, in which the line of sight passes through at the correct angle, no matter to what position the eye is revolved in its socket.

Nothing in Them.

"William," said the good wife, looking up from her paper, "here I see an article that says a man out in Kansas is suing his wife for divorce, simply because she went through his pockets after he was asleep. Goodness knows, William, probably the poor woman never got a cent from the brute of a husband in any other way!"

"Uh, huh," replied William.

"William," came from his better half, "don't you dare sit there and 'uh-huh' me in such a manner! What would you do if you woke up and found me going through your pockets?"

"Who—me?" asked the sleepy husband, who had already turned over his pay envelope to the boss of the house. "Why, I'd get up and help you search, of course, my dear!"—Judge.

Nonsmokers' League Is Slow.

The Nonsmokers' League of America in national convention assembled at San Francisco unanimously decided that "wives should not permit their husbands to smoke in the house" and suggested a matrimonial boycott on smokers. Every town in Kansas has its anticigarette band, girls who have taken oath never, never to have anything to do with young men, or old, who smoke. Why was Kansas, whence all good reforms come, not represented at the San Francisco convention? Old Bill White is neglecting his duty again.—New York Sun.

REPEATING SHOTGUNS

No matter how big the bird, no matter how heavy its plumage or swift its flight, you can bring it to bag with a long, strong, straight shooting Winchester Repeating Shotgun. Results are what count. They always give the best results in field, fowl or trap shooting, and are sold within reach of everybody's pocketbook. Made in three different models and in 10, 12, 16 and 20 gauges.

DEALERS EVERYWHERE SELL THEM

CAPACITY OF AVERAGE SILO.

Easy Matter to Determine Number of Cubic Feet of Ensilage Required to Feed Cows.

(By A. D. WILSON, Superintendent Extension Division, University Farm, St. Paul, Minn.)

The amount of silage required and the size of silo needed to hold it can be quite closely calculated, provided the number and kind of animals to be fed from it are known before building.

An average cow or beef animal may be fed about 35 pounds of silage per day, and the usual period during which silage is used in this latitude will be about 210 days. Large animals or those that are being fattened may consume considerably more than 35 pounds per day, but this has been found a fair average.

In a silo of ordinary depth, the average weight of the silage is about 40 pounds per cubic foot. Near the top of the silo, however, where the pressure is not great, it will weigh only 25 pounds per cubic foot, while at the bottom of a 35-foot silo it may weigh 60 pounds. Taking these averages, if a cow eats 35 pounds of ensilage in a day, she will eat 35-40, or ⅞ of a cubic foot per day, and with this as a basis it is easy to determine the number of cubic feet of ensilage required to feed a cow or any number of cows throughout the season. The diameter of the silo must be such that the stock on hand can use one or two inches of silage off the top each day during the winter, and at least three inches per day when summer feeding of silage is to be practiced. This is necessary to keep the silage from spoiling.

A silo 10 feet in diamter is adapted to feeding 10 mature cattle. One 12 feet in diameter will feed 15 head, and one 14 feet in diameter will meet the needs of 20 head; but if there are 30 or more cows to feed, a 16-foot silo should be erected. These silos should be 30 or 40 feet, or even more in height.

To Break In New Shoes.

Always shake in Allen's Foot-Ease, a powder. It cures hot, sweating, aching, swollen feet. Cures corns, ingrowing nails and bunions. At all druggists and shoe stores, 25c. Don't accept any substitute. Sample mailed FREE. Address Allen S. Olmsted, Le Roy, N. Y.—Adv.

Strange Glad Hand.

"That man must love you. He made so much fuss over you. What's his name?"

"I don't know."

"But he seemed so glad to see you."

"Yes. He was very effusive."

"Haven't you any idea who he is?"

"Not at all. I've seen his face somewhere, but I can't place him."

"But he acted like a long-lost brother."

"He surely did. I can't make up my mind whether he really knows me or is a candidate for office."—Detroit Free Press.

Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. Sugar-coated, tiny granules, easy to take. Do not gripe.—Adv.

Lucky Author.

"Well, how did your novel come out?"

"Not so badly. I made pretty fair terms with a junk man to take the entire edition."—Louisville Courier-Journal.

After Twenty Years.

"I see an Englishman who has been twenty years in the jungle has returned to civilization."

"And what an imopportune moment he selected."—Baltimore American.

Home and School Club

The Home and School Club held its first meeting for the year Tuesday afternoon. The resignation of Mrs. Blaine as president was read and accepted, and the election of a successor left until the October meeting.

Some ideas and suggestions were discussed for the year's work, and then meeting was adjourned. The last year's program committee volunteering to provide for the next meeting only.

Stuyvesant's Pear Tree.

A pear tree was brought in 1647 or 1665 to the Bowery, then called the Bouwerie, by Peter Stuyvesant and planted on the spot which is now the northeast corner of Thirteenth street and Third avenue, New York. It bore fruit for 200 years, after which it was cut down. A cross section may be seen in the New York Historical Society building.—New York Times.

Local and Personal

Robert Marsh, who has been working here for some time past, went to Fresno yesterday.

Mr. and Mrs. Lee Hutchins visited Campbell relatives over the week-end.

The Rev. J. E. Wilson has been returned to the First M. E. church of San Francisco by the conference which closed session Monday.

Every member of the F. A. U. is urged to be present this Saturday night as Mr. J. E. Simons, the organizer will be there to answer any and all questions.

A wedding anniversary dinner was given at the W. D. Sturtevant home Monday evening, in honor of Mr. and Mrs. Richard Mills. Rev. G. E. Atkinson, and wife were guests at both affairs.

John W. Brown, much better known locally as "Grandpa" Brown, celebrated his 90th birthday Wednesday. He kept "open house" all day, himself constituting the reception committee. Thirty-five of his relatives and friends called to see him, and he received forty letters and cards of congratulations, and they are still arriving. Grandpa was born Sept. 22, 1825 in Carlisle, Nicholas Co., Ky., and is still a very regular attendant at church and is out almost daily.

Services at Holister

Mrs. Lucy F. Smith returned from Hollister Thursday where she attended the funeral services for her sister, Mrs. Mary W. Sherman, who died here the week before.

Mrs. Sherman was born at the present L. F. Shaw ranch on Johnson avenue. In 1870 she went to Hollister where she was married to F. B. Sherman in 1875. She is survived by her husband and son, Elmer.

The services were held at the South Methodist church in Hollister Saturday.

Boost a Little Bit

Anyone almost can be a knocker;
It's easier to tear down than to build,
So why not try your best to be a booster?
With pessimists the world's already filled.
You can't expect that things will always suit you;
In melancholy judgment then you sit?
No. Better far to help along a little;
Better far to boost a little bit.

It never pays to join the anvil chorus,
Or spread unkind reports about your town;
Many there are to hamper and retard it,
Who do their level best to run it down.
What if it has its little failings?
It has it's good points, also—hasn't it?
So why not to the wheel adjust your shoulder;
Why not get out and boost a little bit?

A churlish dog may bay the moon in anguish;
The frog must croak, for nature willed it so,
The mules were placed on earth to do the kicking
(As any good zoology will show)
The good Lord has provided for the knocking,
So if a wider groove you long to fit,
Adopt this as a motto: "BE A BOOSTER"
And then get out and boost a little bit.

Hurt His Feelings.

Lytwayt, the butcher, had been very busy for a few moments with a well worn dictionary. Suddenly he closed it with a snap and glowered at his wife in the cash desk.

"That Mrs. Smartie is getting too clever," he growled.

"What's the matter?" asked the good lady, surprised at this criticism of a good customer.

"When she came in just now she told me I ought to rename my scales the ambuscade brand."

"Well, why"—

"I've just looked up the word," went on the infuriated man, "and the dictionary says that ambuscade means 'to lie in weight.'"—London Globe.

What Roads Owe to Salt.

Roads, we are told, owe a great deal to salt. According to one theory, the oldest trade routes came into existence as a result of the traffic in salt. One of the oldest roads in Italy is the Via Salaria, along which the people of the Sabine country obtained their salt from the salt pans of Ostia. Salt was the main merchandise carried in the trans-Libyan caravans in the days of Herodotus, and salt is one of the chief elements in the trade along the Sahara caravan routes today. Salt and salt fish, it is interesting to remember, entered largely into the commerce of the Carthaginians. The latter, by the way, was considered a delicacy in those pre-Christian days.—London News.

Pepys and the Garter.

A German knight of the garter perplexed Mr. Pepys sorely 250 years ago. On June 19, 1668, he records in his diary: "To Whitehall, where we attended the Duke of York in his closet, on our usual business. And thence out, and did see many of the knights of the garter, with the king and Duke of York, going into the privy chamber, to elect the elector of Saxony in that order, who, I did hear the Duke of York say, was a good drinker; I know not upon what score this compliment is done him."—London Chronicle.

THE TERRIBLE WAR

THE war drags its way in Europe; on sea and on land, under the sea and in the clouds; the first bitterness seems to have crystalized into a consuming hate which adds a new savagery to all that is done. It almost seems as though among those contending nations "judgment had fled to brutish beasts and men have lost their reason."

What is hoped for? Thirteen months of fighting and nothing gained. Millions of men have died, every home is in mourning, a debt which can be named but whose magnitude is beyond comprehension, has been created; the winter is already on in the Alps, and, on the eastern frontier the advance columns are planting their gurdons; what is expected by continuing the frightful sacrifices?

Cannot the neutral nations do something? Why should not our government call a new session at The Hague Tribunal? Has it no influence, especially if backed by all the sister neutral nations and the head of the church whose religion is the ruling one among half the nations that are at war?

Have not men enough been killed already? Have not hearts enough already been broken? Has not the debt reached magnitude enough?

Have not the representatives of our hundred millions of people no influence?

All Spanish-America would join us, so would Spain and Holland and Denmark and Sweden and Norway in a conference that would cry out for peace and ask all the belligerents to cease killing each other and submit their respective claims to arbitration. Why not try it?—*Goodwin's Weekly.*

WASTED SYMPATHY

SOME of the leading magazines of today do not know any better than to "pity" and "sympathise" with the young people of the country districts for not having the opportunity to secure an education, and do not appear competent to understand that a young man in the rural district has every opportunity in the world for an education at this age of the world if he only has the desire. The lives of the people in the country are not so occupied with frivolity as are those who reside in the city, and their minds are in better condition to receive and retain instructions than those who are set about on all sides with attractions of a frivolous nature.

With good graded public schools, circulating public libraries, scientific courses taught by mail, etc., etc,, no one in the country need go without an education, and the magazines had better direct their pity and sympathy to the youth of the city who are apt to be too well educated in wine halls, dance halls and various other accomplishments which do them more harm than good.

MESSRS. HALAMICEK and KALAS have instituted what may become quite a profitable feature in the fruit business. Last year they sold and shipped quite a quantity of their dried fruit to friends in Chicago. The scheme moved so popular both to producer and consumer that this year a larger quantity has been sold in that way. It is quite customary for a consumer in the east to go into a store and ask for prunes without specifying the particular kind. By the method pursued by these gentlemen, they have created a demand for prunes grown in the Santa Clara Valley, the best varieties in the world.

People living in this valley can do much to advance the sale of their products by urging their eastern friends to ask for Santa Clara County dried and canned fruits, and may be able to find local eastern markets where the fruit of an entire community may be disposed of. In this or similar ways, within a short time the demands for our Santa Clara Valley products thruout the eastern states can easily be doubled.

ALL those who have registered as voters within their respective precincts during the past two years need not re-register. If a change of residence has been made into another precinct it will be necessary to register at least 30 days before the special referendum election in October. Do it now as there are only a few days of grace left.

Wizard Fertilizer is four times the strength of others.

Mr. and Mrs. E. H. Zion of Modesto were here for the week-end.

A fine enlargement free with Kodak coupons. See Smith about them.

Insure that prune crop in reliable companies. Campbell Realty Company, Agents.

The C. E. will hold a "Kid Soshil" Saturday evening, in the Congregational church parlors.

Prof. Jan Kalas is a member of the College of Pacific faculty, as one of the instructors of music.

Col. C. B. Ringe who has been quite seriously ill for several weeks past was reported yesterday as very much improved.

Mr. and Mrs. Fred Bohrman and daughter are planning to go to Pacific Grove Saturday for a visit with Grandpa and Grandma Collins.

The J. L. Hagelin and Olut Strom families motored to Pacific Grove via Santa Cruz Sunday, and also enjoyed the "17 Mile Drive." Mrs. Strom remained at the Grove.

The Eighth Grade class at the Grammar school was organized this week and the following officers elected: Helen Kalas, president; Adelbert Billiou, vice-president, Miriam Taylor, secretary-treasurer.

The Grammar school boys are busy on the diamond with the newly organized team and are playing the first game of the winter series against Hamilton today. The team is composed of C. Isbell, E. Gattrell, V. Harris, W. Ferro, G. Benner, N. Kelley, L. Graton, L. Harris, L. Reed, S. Isbell, captain, and H. Shell, manager.

There will be an important meeting of the Improvement Club this (Friday) evening. There are reports from several committees to be considered, and some matters needing immediate and enthusiastic pushing. Every member and others interested in the advancement of Campbell and vicinity are urged to be present. Library Building, at 7:30.

Employees Celebrate

Geo. E. Hyde & Co's. Cannery was the scene of a very pleasant party on Tuesday last, the occasion being the second of the annual reunions to be held there.

The young folks had spared no pains in decorating and the room looked very pretty with its trimmings of pink and green.

The evening's entertainment began at eight o'clock with a short but choice program, as follows.

Instrumental Solo	Mrs. Harris
Song	Mrs. Ralph Hyde
Reading	Miss Merle Isbell
Song	Miss Winnie Bibb
Song	Miss Clara Pope
Song	Mr. Jas. McGraph

After the program dancing was indulged in until the call came for supper.

The tables were set in the Dryer, where again the color scheme of pink and green was carried out, and about one hundred and fifty were seated at the well laden tables.

At the conclusion of the banquet Mrs. Waite, with a few well chosen words presented Mrs. Nettie Jensen, the forelady, with a handsome gold bracelet watch.

Mr. McGraph followed suit by presenting Mr. J. Fore, the superintendent, with a gold mounted meershaum pipe.

The gifts were from employees and employers and were symbolical of the spirit of hearty good will and fellowship, which has pervaded the factory during the season just ending.

Mrs. Jensen and Mr. Fore responded with short speeches.

Speeches were also made by Messrs. George and Ralph Hyde and were briefly responded to by Mrs. Baldwin, in behalf of the employees.

After supper the meeting once more adjourned to the Cannery where dancing was indulged in until a late hour.

Two High Awards

The Panama-Pacific Exposition Company has announced the presentation of two "highest awards" to the Southern Pacific Company for its participation in the Fair. One is the highest award for "railway track, equipment, motive power and safety first appliances" and the other is the highest award for traffic promotion. They come in the nature of two banners, specifying why they were given and bearing the official Panama-Pacific ribbon.

The railway track, equipment, motive power and safety first appliances of the railroad company are on exhibit in the Transportation building, and include, among other things, the old C. P. Huntington, first Central Pacific locomotive. In striking contrast to this, one of the oldest locomotives in the United States, is one of the Company's big Mallet engines used on the Tehachapi.

The traffic promotion exhibit is contained in the Company's own building at the head of Palm Avenue near the Fillmore Street entrance. Here are rest rooms for men and women, the "Glado", with a miniature reproduction of noted scenic spots along the Southern Pacific, ticket offices and the Sunset Theater, with motion pictures, illustrated lectures and organ recitals daily. Visitors are Company's guests, everything being free.

C. B. Caught a Fish

C. B. says it was a Lock Leven trout and measured 22 inches in length. In fact it measured 22½ but for good measure he threw in the half inch. It happened up at Star Lake about 10 miles from Lake Tahoe Valley. He had been piloted by the noted Indian scout and interpreter, Jerry, the one time pride of the Washo tribe. The excitement began when the big beauty struck. C. B. commenced to reel it in in the approved style but the excitement of the sport soon brought out the primitive instinct so he grabbed the line and pulled the young whale in hand over hand as fast as he could, forgetting rod and reel. Just as he landed the fish on the sand, the big fellow slipped the hook but by this time C. B. was back in the cave dweller period and he simply hopped on the squirming fish at the edge of the water like a wild Comanche. With a yell that took Jerry back to his boyhood days, C. B. landed that fish and every man, woman and child at Myles can testify to its genuineness as all have seen it. Ask C. B. about it.

(Coutributed by a friend (?) who was in that part of the woods, but didn't hear the yell. Arrived too late for last week.)

Stag Dinner

Mrs. E. E. Lanphear entertained a party of Mr. Lanphear's intimate friends at six o'clock stag dinner, Wednesday evening at their home on South Second street.

The occasion was given as a surprise birthday party, Ethan being at his 27th mile post that day. After spending a most sumptuous dinner hour, the boys gathered at the piano for a bit of rollicking song.

The balance of the evening was spent at cards, all entering into one big game of "Hearts." The head prize, a pretty stein, was carried off by H. C. Smith who won over Alex Adam in a draw for tied score. The consolation prize, a cute wooden stein, was captured by D. H. Cramer.

Mr. and Mrs. R. K. Thomas are home again, tired of fish and sea for awhile.

Miss Charlotte Castle of Tropical, Cal., spent last week here the guest of friends, the R. J. Billiou family.

We are not compelled to buy our candies from other people. Many years of experience enables us to manufacture our own confections. They are made every day and you are invited to come into our shop and watch us work.

What It Costs to Advertise

A good many people wonder what it costs to advertise in such publications as the Ladies Home Journal and the Saturday Evening Post. The Curtis Publishing Company, publishers of these magazines have recently announced a new schedule of rates. They are somewhat higher than the Journal's rates. For instance an inside page in The Ladies Home Journal costs $6,000 for one insertion. Ads on the cover pages vary in price from $7,000 to $10,000 for one insertion. The rates in the Post are $5,000 for a full page, $6,000 for the second or third cover in two colors, $7,500 for the fourth cover in two colors, $10,000 for center double page in black, and $12,000 for center double page in two colors.

State of Ohio, City of Toledo, Lucas County, } ss.

Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of HALL'S CATARRH CURE.
